

The 12th International Congress of South-East European Studies, held in Bucharest (2-6 September 2019), included a section entitled *New Perspectives on Balkan Linguistics / Nouvelles perspectives sur la linguistique balkanique* that set out to provide a comprehensive overview of current trends in the field. The present volume has a twofold structure and deals with aspects of regional language contact, from the perspective of comparative and historical grammar, phonetics, and the historical development of the lexicon. The studies reflect continuing linguistic interest in the history of contacts between the languages of South-eastern Europe, as well as in aspects of modern exchanges.

The contributors are Petya Asenova, Victor A.
